

E-Discovery Review

Perlustro produces many different products that are used in the EDRM process. They are used to acquire and manage Judicial E-Discovery processes from collection to review.

Soon, specific versions of these products tailored separately to both Civil and Criminal Digital Forensics investigations will be available.

IVault, currently in release for the ILookPI toolset, is only one of a group of interrelated tools which provide ease of use and unparalleled protection to any system, but uniquely to a reviewer system, even one on an otherwise unsafe network. In some forms of this tool, Ivault which has no equivalent application anywhere in the Ediscovery process.

If you have questions on these products, please email Perlustro at ediscovery@perlustro.com.
